BCG X Delivery
Talent Acquisition Team – Casablanca

Re: Application for Data Analyst Intern – BCG X Delivery, Casablanca

Dear Hiring Team,

I am writing to apply for the Data Analyst Intern position for two months at BCG X Delivery in Casablanca. As a final-year Computer Science student specializing in Artificial Intelligence, with a Minor in Business Administration at Al Akhawayn University in Ifrane, I am drawn to BCG X precisely because of its mission to combine deep technology expertise with real-world business impact, a combination that reflects both my academic training and my professional ambitions.

Technically, I have built a strong foundation in data analysis, SQL, machine learning, and information systems through my Computer Science major. I am comfortable working across the full data workflow from cleaning and structuring datasets to deriving insights and communicating findings to non-technical audiences. My Business Administration minor has further sharpened my ability to frame analytical work within a strategic business context, which I understand is central to how BCG X operates.

Beyond academics, I have gained practical experience coordinating remote teams at Systemic Digital, developed client-facing skills through a sales role at Palais du Caftan, and was selected as a finalist and Angel Round Qualifier in AUI's Ventures Adventures entrepreneurship competition. These experiences have reinforced my ability to take initiative, work under pressure, and think with both analytical rigor and business judgment.

I am particularly excited about BCG X's Casablanca hub and its role in driving digital transformation across African and global markets. I believe the intersection of AI and consulting is where some of the most meaningful business challenges are being solved today, and I would welcome the opportunity to contribute to that work as part of your team this summer.

Please find my CV attached. I am available at your convenience for any further discussion and would be delighted to complete any assessment or interview as part of the selection process.

Thank you sincerely for your time and consideration.

Best regards,

Nisrine Noussi
